

Bliss Event Cleaning

The event cleaning division of Bliss supports all venues from small to big. From suburban ovals to the major sporting stadiums, it doesn't matter if it's a soccer game, footy or festival, we can arrange a wide scale of support, going from waste management to a full clean after the event.

We can supply machinery, waste management programs, and cleaning operators. We have unlimited resources.

We can assure you the location will be left in the same or even better condition as before the event.

We offer a comprehensive range of services, combined with our flexibility, we can clean your venue with a difference.

Pre event cleaning

We can prepare the location to your clients needs, to ensure that catwalks, hospitality lounges, stairwells, venue area and restrooms are in superb condition.

On site and move in preparation

Waste collection areas can be organised

During the build up the cleaners will keep the venue as clean as possible and on the last move in day they can remove all the bulk waste.

End of day cleaning

Every night we can arrange cleaners to come in to get the venue in pristine condition for the next day.

Post event cleaning

We can assure you the location will be left in the same or even better condition as before the event.
